CHINA HELICOPTER EXPOSITION

The second biggest helicopter exhibition and the only one with a dynamic display in the world

Exciting times ahead for the rotor world in China...

Dramatic changes are on the horizon for the rotor world in China. Current trends are shifting and recent forecasts predict a significant boost for helicopter production, maintenance and construction in China. But why?

- › Increasing demand for more helicopters both in the public & private sector
- › Air spaces opening gradually
- › Implantation of major international aircraft constructors in China
- › Boost in tourism: leasing companies rising need for helicopters
- › Civil Aviation: taking passengers to remote places without runways

With current forecasts predicting a sharp increase in helicopter demand, as well as China's increasing prominence on the world rotor stage, China Helicopter Exposition is an unmissable event for rotor aircraft professionals globally.
